What is a Hypnotic Coach?

By Zoilita Grant

It is the blending of hypnosis and coaching, Hypnotic Coaching is a new and exciting profession that creates an alliance of client and practitioner to achieve the client's goals. As a type of life coaching, hypnotic coaching focuses on clients' goals to create success. Hypnotic Coaching entails working with people who already have a measure of "success" in their lives, but who want to bridge the gap between where they are and where they want to be in their profession and their personal life. A Hypnotic coach is much like a trainer who helps an athlete win the "gold medal" – not just be in the race. Hypnotic Coaches help their clients design the life they want, bring out their clients' own brilliance and resources so that they can achieve excellence and create purposeful, extraordinary lives. Hypnotic Coaching deals with functional people who want to move toward higher function – and achieve excellence while creating an extraordinary life. Hypnotic Coaching is a process similar to solution-focused techniques that are used for less serious psycho-emotional problems and life stresses. Hypnotic Coaching goes beyond problem solving and co-creates a life for the client that is purposeful and focused.

Why Get Certified

Life Coaching is so far an unregulated field owing to which there are no specific entry requirements in terms of education or work experience. This is where a certification and the associated tag "**Certified**" gain importance as they give you the *necessary edge on the competition*.
